

The Gallery of Music 18th year

A Series of Chamber Concerts ↳ The Concert Hall of the County

The Gallery of Music is a series of chamber concerts focused on providing a better understanding of classical music from all historical periods including the current one. In 2023, we want to present important pieces of both solo and chamber music from various historical periods including the current one. Pieces by international and national composers will be performed by successful musicians who have established themselves on the national and international scenes. The main purpose of the concert series is to support high-quality concert art that can be developed in an architecturally and acoustically unique concert space – the Concert Hall of the County House featuring a piano from Steinway & Sons.
